CENTRAL INTELLIGENCE AGENCY  
WASHINGTON 25, D. C.

15 August 1956

MEMORANDUM FOR: Chairman, Guided Missile Intelligence Committee

SUBJECT : Guide Requirements Applicable [REDACTED] 25X1C

25X1A

1. During their visit to the REG, [REDACTED] in June 1956, GMIC representatives stated that GMIC was in the process of reviewing all interrogation guides applicable [REDACTED] and intended to send the REG a set of such guides. In order to assist GMIC in bringing the guide file at the REG up to date, a review has been made of all guides available at the REG which are considered applicable, so that upon completion of GMIC's study, it will be necessary to send only those guides which the REG does not have.

25X1C

2. The attached list prepared by the REG is broken down into three categories. Category I includes those guides which may be of use as background material for case officers and technical specialists in preparing for [REDACTED] interrogations. All case officers will review these guides prior to the [REDACTED] Category II lists those guides which may be useful in individual cases, depending upon the knowledgeability of the source. These guides will be kept in mind each time a new source arrives at the REG and those which are applicable will be used in his interrogation. Category III lists those requirements and background papers which it is believed represent the best guides available in the Field for the interrogation of each [REDACTED] These will be used in the interrogation of each [REDACTED]

25X1C

3. Although the length of the attached list is quite imposing, none of the guides which are now available have been prepared specifically for [REDACTED] It is suggested that GMIC in its review consider whether enough information is not available from [REDACTED] and other installations from which [REDACTED] specialists were collected, to prepare such a specific guide. The REG does not feel strongly on this matter, however, and will leave the decision to GMIC as to whether it prefers to furnish general guides [REDACTED] at this time or to rely on specific requirements drawn up for individual sources after their defection.
